ELS Europe

Effective Sustainable Solutions

for environmental risk management,
strategic sustainable finance and profitability

ELS Europe is a dynamic and responsive consultancy delivering solutions to financial and non-financial organisations needed to meet the challenges of an ever-changing market that is increasingly climate positive, circular, regenerative, as well as competitive.

Market-leading consultancy

As a market-leading consultancy, ELS Europe supports capital flows towards environmentally and socially sustainable economic activities. We deliver strategic risk management solutions, in-depth knowledge of disclosure requirements, and help innovative organisations to put into action their sustainability-related opportunities.

Our solutions include

*We are a valued and trusted
solution provider to our clients
and partners*

We clearly articulate relevant risk management recommendations and develop short-, medium-, and long-term timelines for implementation. The outcomes of this work drive better operational results through greater alignment on issues that are material to our clients and form the basis for development of a cohesive sustainability strategy clearly linked to business model and financials.

Extensive experience

ELS Europe's team of environmental, legal, and financial experts offers knowledge of all aspects of environmental and social sustainability, helping our clients to make informed decisions. Our extensive experience with the European Commission DG-FISMA through membership in the EU Taxonomy technical expert group (TEG) and as Co-chair of the EFRAG report on Sustainability Risks and Opportunities demonstrates ELS Europe's commitment and trust earned across non-financial and financial organisations, as well as regulatory bodies.

We are a valued and trusted solution provider to our clients helping to achieve their sustainability aims across financial and non-financial sectors, regulators, prudential authorities, and service providers. Our solutions evaluate sustainability-related risks and opportunities, identify suitable performance metrics, establish responsible governance and sustainability risk management practices, achieve reliable disclosures that go beyond compliance, and exchange knowledge amongst key stakeholders.

*We guide our
Clients on how
to plan and
implement
their unique
sustainability
strategy*

ELS Europe aims to ensure that sustainability-related risks and opportunities across the entire value chain of an organisation are clearly understood in terms of their characteristics, inputs, impacts and outcomes, timing, and linkage to financial key performance indicators.

We advise our clients on how to plan and implement sustainability strategies developed for their unique business model and stakeholder needs – helping to measure progress, effectively use disclosure tools and to disclose relevant information clearly and consistently.

Tailored solutions

We help your organisation to mitigate physical risks, adjust to change, avoid distress, and guide you and your team in the transition journey towards sustainability, all the while considering your organisation’s core needs, customers’ expectations and capacity for change. We aim to support good disclosures which demonstrate to stakeholders, how and to what extent your organisation is integrating relevant sustainability objectives into your business model including climate change mitigation and adaptation, circular economy, protection of biodiversity, pollution control and sustainable use of water resources, as well as ensuring social fairness and prosperity.
